

Funny Customized Kids Play Area Rug creates a safe and soft place for playing and learning for babies and children. Funny Customized Kids Play Area Rug is specially designed for children and is made of soft and environmentally friendly fabric materials. Funny Customized Kids Play Area Rug provides a safe and fun play space for your children, allowing them to roll, crawl, toddler and play! With excellent cushioning performance and interesting design, it has been tested in the laboratory and is absolutely safe for children. In addition, this mat is large enough for the whole family to use it, not only for yoga, pilates, general sports or play, but also for active video games, and it can even be used as a tent floor during camping. You can use it anywhere to create a safe and fun play space for your children and the whole family!

OTHER DESIGN

Funny Customized Kids Play Area Rug is a sensory game for kids. Simply put, sensory games are any game activity that encourages the use of different senses by touching, watching, tasting, smelling, hearing and moving. Children's brains develop as they use their senses to process information, and more sensory games will promote better brain development. Sensory games also directly affect the development of fine and gross motor skills.

Here are some of the benefits of baby sensory games:

1. Increase neural connections in the brain.
2. Improve children's body awareness because they use different parts in different ways.
3. Stimulates all senses, so each senses develops at the same speed.
4. Improve children's comfort in unfamiliar environments.
5. Allow the baby to gradually be exposed to more stimuli instead of attacking the senses immediately.

6. Lay a foundation for problem solving and other learning skills.
7. Help children calm down and reduce anxiety.
8. To teach basic scientific processes by studying causality.
9. If you want to know when your baby is ready for sensory games, we have the answer now! Even if your baby is still in the womb, she will be exposed to sounds, smells and tastes around her. Even newborns can gradually perform sensory activities in an age-appropriate way.
